

SACROLIVE PROBIO

“ Symbiotic microbes for Poultry ”

- **SACROLIVE PROBIO** is a probiotics have combination of useful yeast, bacteria and cyanobacteria
- **SACROLIVE PROBIO** are intestinal micro biota, epithelium, and immune system providing resistance to enteric pathogens by decreasing bacterial enzyme activity and ammonia production
- **SACROLIVE PROBIO** contains dry yeast is a vital source of amino acids needed by chicken for growth
- **SACROLIVE PROBIO** helps in direct nutritional effect or their ability to improve feed intake among birds, contains single cell proteins
- **SACROLIVE PROBIO** helps nutrient uptake from the gut by lowering pH of the gut through the production of wide range organic acids
- **SACROLIVE PROBIO** inhibits proliferation and multiplication of *E. coli* and *Salmonella*

PRODUCT SPECIFICATION

Temperature	:	20°C-55°C storage condition
Biodegradability	:	Best Before 12 months
pH optima	:	5-7
Total count	:	12-16,000 billion CFU/g
MRP	:	Ask for quote
Dosage	:	Broiler/Layer 50-100g/ton Breeder -100g /ton

PACKING AVAILABILITY

10 KG, 25 KG
HDPEbags and HDPE drums

" Symbionts with Microbes "

SACROLIVE PROBIO

“ Symbiotic microbes for Poultry ”

COMPOSITION

PROBIOTICS IN SACROLIVE PROBIO

Saccharomyces cerevisiae

Bacillus subtilis

Bacillus amyloliquefaciens

Bacillus licheniformis

Bacillus licheniformis

Lactobacillus acidophilus

Lactobacillus casei

Lactobacillus bulgaricus

Propionibacteria freudenreichii

Pediococcus species

Streptococcus lactis

Bifidobacterium lactis spores

Spirulina

SACROLIVE PROBIO
is an animal feed supplement,
not a medicine
and not for human use

*Dosage : Broiler 50-100g/ton
Layer 50-100g/ton
Breeder -100g /ton*

Total count: 15,000 billion CFU/g

BENEFITS;

Produces bacteriocin that eliminates
pathogenic bacteria

Inhibition of pathogenic organisms

Improves immunity, reduces usage of antibiotics

Helps nutrient uptake from the gut by lowering pH
