

AMMO-DE

AMMO-DE is a comprehensive water treatment solution designed to enhance aquatic environments by effectively managing ammonia levels. It incorporates *Yucca schidigera*, a natural plant extract known for its ability to bind ammonia and reduce its toxicity, ensuring a safer habitat for aquatic life. The inclusion of *Aloe vera* provides soothing and healing benefits, promoting overall fish health. The product also contains beneficial bacteria such as *Bacillus subtilis*, *Bacillus polymyxa*, and *Bacillus licheniformis*, which aid in the breakdown of organic matter and further reduce ammonia levels. Additionally, *Nitrosomonas*, *Nitrobacter*, and *Pseudomonas denitrificans* are nitrifying bacteria that convert ammonia into less toxic forms like nitrite and nitrate. To enhance nutrient absorption and minimize waste production, AMMO-DE includes digestive enzymes, contributing to overall water quality improvement. This holistic approach ensures a balanced and healthy aquatic environment.

BENEFITS

Natural and Effective

Easy to Use: Ammo-De is readily available and easy to administer

Safe for Fish: Ammo-De is formulated to be safe for fish and other aquatic life
